PRICE LIST***INSTRUMENTS**

Effective July 1, 1960 (Supersedes Issue Dated February 1, 1960)

Specifications

To as great an extent as possible, all modifications of instruments such as power-supply potential and frequency, and cathode-ray-tube type have been classified under separate catalog numbers. In the great majority of cases, therefore, it is merely necessary to give the catalog number to specify completely an instrument. It is always helpful, however, to include such additional information as may be deemed advisable to specify the equipment properly.

Changes in Specifications

The right is reserved to change the published specifications of equipment at any time and to furnish merchandise in accordance with current specifications without incurring any liability to modify equipment previously sold, or to supply new equipment in accordance with earlier specifications excepting under the classification of special apparatus.

Instruments with Special Tubes

To cover the cost of special handling and extra packing, there is an additional charge of \$7.50 for supplying most Du Mont instruments equipped with a cathode-ray tube with a phosphor different from those listed as standard and on this price list.

Export Orders

Duly-appointed Du Mont distributors exist in most foreign countries. Orders and inquiries from all foreign countries, with the exception of Canada and all U. S. possessions beyond the continent of North America, may be addressed to the International Division, as shown below. Cable address is ALBEEDU, NEW YORK. Canadian inquiries should be directed to the Factory Sales Office.

Method of Shipment

All instruments shown are shipped, F.O.B., Clifton, New Jersey.

Export shipments, excepting shipments to Canada, are made F.O.B. our warehouse in New York, New York. There are no extra charges for packing or for shipping cases for domestic or Canadian shipments. Shipping cases are not returnable.

Terms of Payment

Our terms of payment are net 30 days, from date of shipment, subject to approved credit rating. To avoid delays in shipment, it is advisable to establish credit, although C.O.D. shipments will be made. All quotations are subject to thirty-day acceptance, and Du Mont reserves the right to invoice at prices in effect at the time of shipment, which prices shall vary no more than 15 per cent. For terms on export orders, contact Du Mont International Division; address below.

Discount Policy

When quantities of any one item are purchased on a single order with a single delivery specified, the following discount schedule is applicable:

0-9 units	0%
10-24 units	2%
25-49 units	5%
50-99 units	7%
100 or more	10%

When quantities of any one item are purchased on a single order where multiple shipments are contemplated, discounts may be negotiated.

Delivery

Promised shipping dates are acknowledged from date of acceptance of order, and they are conditional upon circumstances beyond our control.

*All prices are subject to immediate change without notice.

Return Shipments

In many cases, equipment has been returned to us or our service depot, without authorization, and without need for examination, resulting in unnecessary shipping costs. When it is planned to return equipment, our Service Department, or our Service Depot nearest you, should be first consulted. Considerable saving in time and money will be effected by this procedure.

No repair work will be accomplished without written authorization from the owner either in the form of a letter or purchase order. If instruments are received in damaged condition, an inspection report should be filed immediately with the carrier.

Repair Parts

When ordering repair parts for equipment, the type number and serial number of the instrument must be given. These will be found on the front or rear panel. Parts should be designated by Du Mont part number and symbol number shown on the schematic diagram of the instrument.

Warranty

All instruments manufactured or sold by us are guaranteed against defective workmanship and materials for a period of one year from date of sale. Guarantee cards, which are shipped with the instrument, must be returned to us upon receipt of the equipment in order to make this guarantee valid.

Guarantees, in addition to the statements given above, are to be defined by the specifications of equipment as given in our current advertising information and catalog, and they are subject only to specific modification.
